

Connected

Pro Suite applications work hand-in-hand.

From opening checking accounts to customizing mortgages to authorizing commercial loans, each application within Pro Suite shares information with other Pro Suite applications. This integration greatly reduces time spent on data entry and provides greater cross-sell and up-sell opportunities. Pro Suite can also connect with dozens of host systems, and is easy to maintain in a network environment. We've proven it for ten years. For more information on Pro Suite, call us today at **800-274-7280**, and learn how a truly connected business origination suite can help you serve your customers' needs and increase your profits.
